

RONDÉLL

Global Design Lab

At Rondell, we stay at the forefront of trends through close collaboration with our talented global designers and forecasters. Our skilled teams bring years of experience with renowned brands, crafting everything from formalwear to luxurious attire. Together, we create designs that reflect innovation and quality, suited to a wide range of styles and preferences.

We craft sustainable outfits catering to all categories for brands

Men

For men, we create the most dapper and comfortable apparel ranging from formal wear to loungewear.

Women

For women, we produce the most fashionable and stylish apparel that always trends without compromising comfort.

Kids

For children, we prioritize comfort and produce apparel that is gentle on their skin. The kids' best interest is our top priority.

Creating brands across every category

Activewear Streetwear Casualwear Formalwear Bespoke

Transforming concepts into reality

We bring new concepts to life through innovation at every stage. Our aim is to design, plan and implement more sustainable collections on a regular basis.

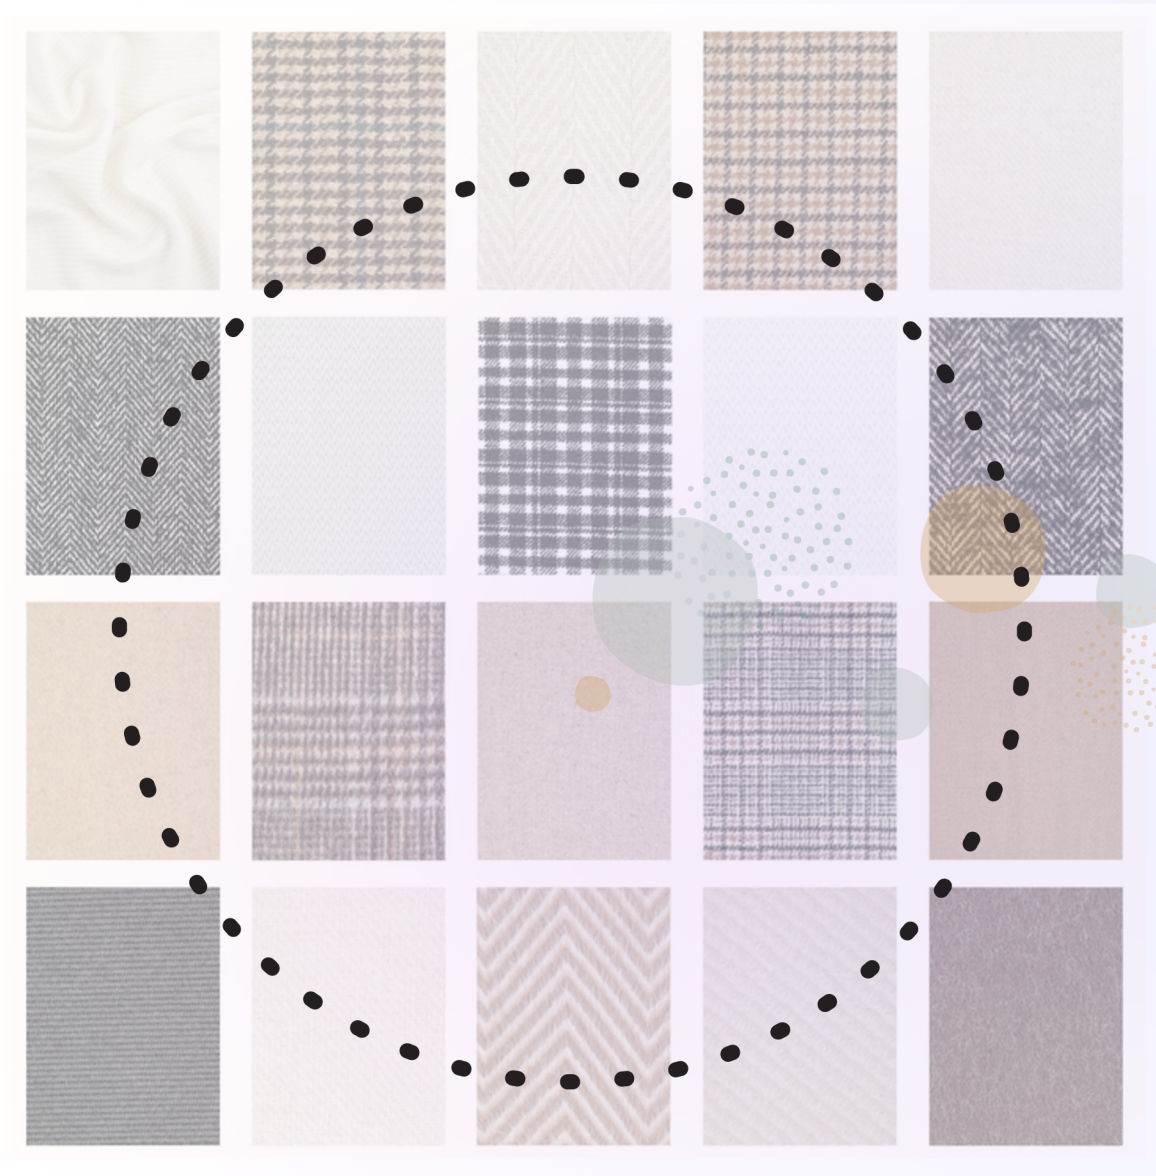

Our collection has no bounds

We produce tens of thousands of sustainable collections per year to keep our creativity running. Our team relentlessly strive to come up with new ideas and create collections of designs and materials.

Building brands together

We build collaborative relationships with brands to come up with innovative designs and ideas that are capable of making an impact in the industry with sustainable and stylish clothing.

Innovation

Brand new Materials Pack every month

Our in-house teams collaborate with international groups to develop innovative designs that are both sustainable and trendy. We publish brand new material packs every week as a result of our intensive research and development, and strive to make our designs long lasting, organic, and eco-friendly.

Implementing Innovations That make an Impact

The commitment to protecting the environment drives our effort to create luxurious and sustainable materials, and to popularise them globally with innovative designs that put smiles on people's faces.

Reducing Carbon Footprints with sustainable materials

With the support of our foreign research and development team, we recreate rare exquisite fabrics to ensure that you always find the masterpiece you are brewing.

We Produce What You Need

We provide brands with a flexible supply chain to make responsible fashion choices more affordable and accessible.

DIVERSE PRODUCT

Apparel: From contemporary fashion to sustainable collections, we cater to men, women, and children, including activewear and specialty items.

Accessories: Our collections include bags, hats, jewelry, and scarves, crafted with an eye for detail and quality.

Footwear: We work with top-notch manufacturers who specialize in everything from casual sneakers to high-quality sandals, ensuring comfort, durability, and style.

Home Textiles: We source and design a range of home products, including organic bedding, hand-woven textiles, and decorative pieces, with a focus on artisanal craftsmanship and sustainable materials.

Certified sustainable processes

We believe in complete transparency and traceability so that you know what goes on behind the scenes from designing to manufacturing.

- 13+ GOTS** certified factories
- 16+ OCS** certified factories
- 11+ LEEDS** certified factories
- 20+ OekoTex** Certified Factories

SWEATER		5 Million Pcs/Year
DENIM		5 Million Pcs/Year
OUTERWEAR		1 Million Pcs/Year
OTHERS		2 Million Pcs/Year

We take care of your manufacturing worries, so you can focus on your brand

No minimums

We value our customers' wishes above all hence, coming up with the minimum order quantity option was our way of showing gratitude. With this option, you can now order quantities as low as 300 pieces even though high quantity orders reduce waste by up to 25% and require less effort.

SUSTAINABILITY IS THE HEART OF WHAT WE DO

RONDELL

At Rondell International, sustainability is not just a commitment—it's a fundamental part of our operations. We are actively working towards achieving climate neutrality, with 65% of our product lines currently produced under sustainable practices, a number that continues to grow. We prioritize partnerships with manufacturers and suppliers who adhere to the highest standards of environmental stewardship and ethical production. This includes using sustainable materials, reducing waste, and selecting water- and chemical-free production methods wherever possible.

Innovative raw materials

Sustainable materials from natural resources
